## Profile

Junior backend developer with expertise in PHP, Laravel, and MySQL, specializing in building efficient, scalable applications. Also, skilled in front-end technologies including CSS, HTML, JavaScript, and Bootstrap, with a solid understanding of object-oriented programming (OOP). Known for attention to detail, and effective time management. Hard working, with a commitment to delivering high-quality solutions and continuously improving technical skills. Enthusiastic about applying my skills in a real-world setting, solving problems, and contributing to a collaborative development team.

---
